**COMPLETION DATE**

October 2009

**SIZE**

25,000 SF

- 25,000 SF renovation of a 52,000 SF nursing home
- Project consisted of demolition and replacement of flooring, ceiling, wall-covering, handrails and other finishes.
- Portions of the electrical system were updated to meet current DHEC and IBC requirements.
- This project consisted of five phases and the facility continued operation throughout construction.
- Much attention was given to infection, noise and dust control with a heavy emphasis on working with the staff, residents and visitors to accommodate their safety and needs.
