SIZE

62,000 SF

- New, LEED Gold facility constructed adjacent to the football stadium that accommodates the school's growing athletic program and helps with the recruiting process.
- Three-story facility includes: an expanded weight room, training room, team meeting rooms, locker rooms for football, office space, and several conference rooms. The facility also became the new home for the Coastal Carolina University Buddy Sasser Athletic Hall of Fame.
- Project consisted of steel and masonry work and a new curtain wall exterior. Also included the construction of two public restroom buildings to accommodate the crowds at football events.
- Due to poor soil conditions, concrete piles were used for the foundation.
- Aggressive, one-year construction schedule continued throughout the '09 football season, and it was critical to keep this challenging phase of the project on schedule to achieve the delivery date.
