- Addition to the USC Kappa Kappa Gamma sorority house.
- Project expanded the chapter room to hold approximately 300 women, created a better layout for meal service, and added a dedicated study area and more gathering space.
- Scope included metal stud framing, shingle roofing, millwork and interior finishes.
- Due to an aggressive schedule, KKG hired Mashburn in the Spring to assist their architect with pre-construction planning. Mashburn was able to finish the work over the summer before the students returned for the fall semester.
- Our team worked effectively and efficiently to minimize disruptions to ongoing operations.
