COMPLETION DATE

November 2014

SIZE

43,622 SF

- New, 3-story, 58-room hotel and conference center.
- The façade of three historic storefronts was preserved and restored for the exterior; the new brick hotel structure was constructed behind it.
- The hotel features hardwood floors, a bistro restaurant and offers four extended-stay suites. The conference center provides a cutting edge meeting space with superior audio visual and IT capabilities.
- Our team worked diligently to minimize disruption on this tight downtown site.
- Also included in the complex:
 - 8,000 SF meeting and banquet facility that was historically restored from an old stable
 - 2,400 SF of separate, stand-alone retail space
 - 1,600 SF of retail space inside the hotel
 - World-class courtyard and garden facility.
- Several sustainable elements were incorporated including stormwater runoff capture for the courtyard gardens and LED lights in the parking areas.
