ARCHITECT
Spencer Dixon
LS3P Associates LTD
(803) 765-2418

COMPLETION DATE
February 2016

SIZE
12,000 SF

- Following an extensive preliminary bidding and interview process, Mashburn completed a one year preconstruction process with the Owner and design team. This process allowed us to work with the Owner to thoroughly explore ways to save both time and money on the project. The project included a new 12,000 SF sanctuary with seating for 650 at main and balcony levels.
- Features of the building include a Bride’s Room, separate chapel, sacristy, cathedral ceiling, polished concrete flooring, brick veneer and a tower/steeple.
- Parking and traffic flow in and around the facility was maintained for numerous scheduled and unscheduled events which ultimately minimized our footprint and disruption to the Church’s existing operations. Our team also worked closely with the Owner’s vendor on refurbishing eight stained glass windows—all over 100 years old.
- Mashburn coordinated closely with the Owner’s Audio/Visual vendor to provide adequate rough-in accommodations for their work. We also coordinated structural and architectural provisions with their liturgical consultant and vendors including considerations for the altar, Stations of the Cross, crucifix and confessional.
